

First Handout

Prof Bill, Mar 2017

Capstone2017!

We are **not** a class. We're a seminar. We don't have lecture. We have project meetings.

We're like a mini-startup.

thanks... yow, bill

QOTD

Coming together is a beginning; keeping together is progress; working together is success.

- Henry Ford, [quote](#)

We'll work to "come together" in Capstone2017. This will be the key to our success.

Core Values

I'll work to see that these core values guide us this term:

- **Ownership** - Students (and one part-time prof) are the owners of this project and this class. This ain't homework.™ This means consistent care and effort.
- **Teamwork** - We can only win together... communication, cooperation, collaboration... and positivity!
- **Customer focus** - We will listen. We will be agile. We will build tech that works, that is simple and easy to use, and that is beautiful.

Goal

Our goal this term is to deliver a quality software product that will make our users happy.
